US EPA RECORDS CENTER REGION 5

550710

TO: Robert Curry, Chief, Hydrogeologic Unit, Rose Lake

FROM: John M. Alford, Environmental Quality Analyst, Environmental
Response Division, Roscommon District

SUBJECT: The Iron Skillet and The Village Hardware, Alcona County

Bob, attached is the survey map for the referenced sites showing the locations of the six monitor wells installed by your staff (Jean Tolanda).

As you may recall, the wells were installed as the result of gasoline components in two domestic wells in the area. However, two rounds of sampling have not detected any BTX components in the monitor wells.

Due to district priority considerations, this project probably does not warrant additional funding at this time which would be necessary to continue to look for the sources.
